## **BESRA GOLD INC.**

### **Statement of Management's Responsibility**

The accompanying consolidated financial statements have been prepared by and are the responsibility of the management of Besra Gold Inc. ("the Company"). The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board and reflect management's best estimate and judgement based on currently available information.

Management is also responsible for a system of internal control which is designed to provide reasonable assurance that assets are safeguarded, liabilities are recognized and that the accounting systems provide timely and accurate financial reports.

The Board of Directors is responsible for ensuring that management fulfils its responsibilities in respect of financial reporting and internal control. The Audit Committee of the Board of Directors meets periodically with management and the Company's independent auditor to discuss auditing matters and financial reporting issues. In addition, the Audit Committee reviews the annual consolidated financial statements before they are presented to the Board of Directors for approval.

The Company's independent auditors, Grant Thornton New Zealand Audit Partnership, was appointed by the shareholders to conduct an audit in accordance with generally accepted auditing standards in Canada, and their report follows.

Signed:

**John A G Seton**

Chief Executive Officer

Date: 28 October 2020

Auckland, New Zealand

## INDEPENDENT AUDITOR'S REPORT

**To the Shareholders of Besra Gold Inc**T +64 (0)4 474 8500  
F +64 (0)4 474 8509  
www.grantthornton.co.nz**Opinion**

We have audited the consolidated financial statements of Besra Gold Incorporated ("the Company") and its subsidiaries ("the Group"), which comprise the consolidated statements of financial position as at 30 June 2020, and 30 2019 and the consolidated statements of profit or loss and other comprehensive income, consolidated statements of changes in equity and consolidated statements of cash flows for the years then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly in all material respects, the consolidated financial position of the Group as at 30 June 2020 and 30 June 2019, and its consolidated financial performance and its consolidated cash flows for the years then ended in accordance with International Financial Reporting Standards.

**Basis for opinion**

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the consolidated financial statements* section of our report. We are independent of the Group in accordance with the ethical requirements that are relevant to our audit of the consolidated financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

**Material uncertainty relating to going concern**

We draw attention to Note 3 in the consolidated financial statements, which indicates the Group incurred a net loss of \$1.5m during the year ended 30 June 2020 and, as of that date, the company's current liabilities exceeded its current assets by \$19m. Further the Group is dependent on its ability to raise sufficient cash through the issuance of share capital and Pangaea Holdings Limited not acting on the events of default under the Exit Financing note. These events or conditions, along with other matters as set forth in Note 3, indicate a material uncertainty exists that may cast significant doubt on the Group's ability to continue as a going concern. Our opinion is not modified in respect of this matter.

**Information other than the consolidated financial statements and auditor's report thereon**

Management is responsible for the other information. The other information comprises the Management Discussion and Analysis but does not include the consolidated financial statements and our auditor's report thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

**Responsibilities of management and those charged with governance for the consolidated financial statements**

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing these consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to a going concern and using the going concern

basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

#### **Auditor's responsibilities for the audit of the consolidated financial statements**

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit.

We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

The engagement partner on the audit resulting in this independent auditor's report is Brayden Smith.

# BESRA GOLD INC.

## Notes to the Consolidated Financial Statements

### 1. Background and Nature of Business

During the financial years ended 30 June 2019 and 2020, the business of Besra Gold Inc. and subsidiaries ('Besra' or 'the Company') consisted of a sole feasibility stage project in East Malaysia, being the Bau Gold Project ('Bau' and/or the 'Bau Gold Project').

The 30 June 2019 and 2020 financial statements for Besra Gold Inc. are the consolidated operations of Besra Gold Inc.

### 2. General Information & Statement of Compliance

Besra Gold Inc is a limited liability company incorporated in Canada. Its registered office is c/o Solutions Corporate Law Clerk Services Inc, 67 Yonge Street, Suite 701, Toronto, Ontario, Canada and principal place of business is located at Level 1, 63 Fort St, Auckland, New Zealand.

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ('IFRS') as issued by the International Accounting Standards Board ("IASB").

The consolidated financial statements for the year ended 30 June 2020 including comparatives were approved and authorized for issue by the Board of Directors ('Board') on 4 September 2020 (see note 21).

Unless otherwise indicated (i.e. through the adoption of new standards) the accounting policies as set out below have been applied in preparing these consolidated financial statements throughout all periods presented.

### 3. Basis of Preparation & Significant Accounting Policies

#### *Basis of Preparation*

The consolidated financial statements of Besra have been prepared on an accrual basis and are based on historical costs, except for financial instruments that are measured at fair value. The financial statements are presented in United States dollars (USD) which is also the functional currency of Besra Gold Inc. and its subsidiaries and are rounded to the nearest dollar unless otherwise stated.

#### *Basis of Consolidation*

The consolidated financial statements comprise the financial statements of Besra Gold Inc. ('the Company') and the entities (the "Subsidiaries") it controls (collectively "The Group") as listed below:

Company Name	Jurisdiction	Ownership % 30 June 2020	Ownership % 30 June 2019
Besra NZ Limited (formerly OYM NZ Limited)	New Zealand	100	100
North Borneo Gold Sdn Bhd ("NBG")	Malaysia	87.06	87.06
Bau Mining Co Ltd	Samoa	91	91
Besra Labuan Ltd (formerly Olympus Pacific Minerals Labuan Limited)	Malaysia	100	100

#### *Going Concern*

The consolidated financial statements were prepared on a going concern basis which anticipates the Company and the entities it controls will be able to continue its operations for the foreseeable future and will be able to realize its assets and discharge its liabilities and commitments in the ordinary course of business.

During the year ended 30 June 2020, the Group made a loss of \$1,538,822 (30 June 2019: a loss of \$22,500,323). As at 30 June 2020, the Company's current liabilities exceeded its current assets by \$19,021,776 (at 30 June 2019: \$15,082,550). Cash and cash equivalents on hand at 30 June 2020 is \$31,260 (30 June 2019: \$22,467).

Adoption of the going concern basis for the consolidated 30 June 2020 financial statements is dependent on the following:

- Pangaea Holdings Limited not acting on a subsisting event of default under the Exit Financing Note; and
- The Group raising sufficient funds by way of listing the Company's securities on the Australian Stock Exchange ("ASX") through an Initial Public Offering ('IPO') in October 2020.

Pangaea Holdings Limited has confirmed that it is waiving its right to act on its security and will not call on the amount outstanding providing the IPO proceeds as expected. A pre-IPO financing was completed in July 2020 (refer subsequent events note 18) as a precursor to the IPO. A mandate has been entered into with Canaccord Genuity (Australia) Limited for the IPO and the listing process is progressing toward a completion in the fourth quarter of 2020.

As a result, the Directors conclude that the Company remains a going concern.

The dependency on the above forecasted events and cash flows creates a material uncertainty that may cast doubt on the Group's ability to continue as a going concern, and therefore the Group may be unable to realise its assets and discharge its liabilities in the normal course of business. These consolidated financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts, nor to the amounts and classification of liabilities that may be necessary should the Group be unable to continue as a going concern.

#### *Foreign Currency Transactions and Balances*

Foreign currency transactions are translated into the functional currency of the respective entities, using the exchange rates prevailing at the dates of the transactions (spot exchange rate). Foreign exchange gains and losses resulting from the settlement of such transactions and from the re-measurement of monetary items at year end exchange rates are recognised in profit or loss.

Non-monetary items are not retranslated at period end and are measured at historical cost (translated using the exchange rates at the date of the transaction), except for non-monetary items measured at fair value which are translated using the exchange rates at the date when fair value was determined.

#### *Exploration and Evaluation Expenditure*

Exploration and evaluation assets include the costs of acquiring rights and licences, costs associated with exploration and evaluation activity (e.g. geological, geophysical studies, exploratory drilling and sampling), and the fair value (at acquisition date) of exploration and evaluation assets acquired in a business combination or asset purchase.

The Group follows the practice of capitalizing all costs related to the acquisition of, exploration for and evaluation of mineral claims and charging all revenue received until production is achieved against the cost of related claims.

Costs incurred before Besra has obtained the legal rights to explore an area are recognized in the Consolidated Statements of Profit or Loss and Other Comprehensive Income.

Capitalized costs, including general and administrative costs, are only allocated to the extent that these costs can be related directly to operational activities in the relevant area of interest where it is considered likely to be recoverable by future exploitation or sale or where the activities have not reached a stage which permits a reasonable assessment of the existence of reserves.

The aggregate costs related to abandoned mineral claims are charged to operations at the time of any abandonment or when it has been determined that there is evidence of a permanent impairment.

Once the technical feasibility and commercial viability of the extraction of mineral resources in an area of interest are demonstrable, exploration and evaluation assets attributable to the area of interest are first tested for impairment and then reclassified to mining property and development assets.

Recoverability of the carrying amount of the exploration and evaluation assets is dependent on sale of the respective areas of interest, or alternatively successful development and commercial exploitation.

Where a decision has been made to develop an exploration and evaluation asset or assets into a mining operation, the accumulated exploration and evaluations costs for the project would be reclassified as mining properties. Mining properties would be tested for impairment and the accumulated costs, subject to any impairment or revaluation, would then be amortised over the proven and probable reserves, or measured and indicated resources where the criteria to establish proven and probable reserves have not been met.

#### *Impairment of Exploration and Evaluation assets*

The Board of Directors reviews and evaluates the Group's exploration and evaluation assets when facts and circumstances suggest that the carrying amount of an exploration and evaluation asset may exceed its recoverable amount.

The evaluation considers:

- the period of the right to explore, its expiry date and whether it is expected to be renewed,
- any substantive expenditure on further exploration or evaluation that is not budgeted or planned,
- whether any exploration has resulted in resources in a specific area not having commercially viable quantities of mineral resources and further activity will be discontinued in that area, and
- sufficient data exist to indicate that, although a development in the specific area is likely to proceed, the carrying amount of the exploration and evaluation asset is unlikely to be recovered in full from successful development or by sale.

When facts and circumstances suggest that the carrying amount may exceed the recoverable amount, assets are grouped at the lowest levels for which there are largely independent cash inflows (cash generating units ('CGUs')). The Group's CGUs are its individual exploration properties.

Impairment losses are recognized as operating expenses in the period they are incurred. When an impairment loss reverses in a subsequent period, the carrying amount of the related asset is increased to the revised estimate of recoverable amount to the extent that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset previously.

Reversals of impairment losses are recognized in profit or loss with the Consolidated Statement of Profit or Loss and other comprehensive income in the period the reversals occur.

#### *Cash and Cash Equivalents*

Cash and cash equivalents comprise cash on hand and demand deposits, together with other short-term, highly liquid investments that are readily convertible into known amounts of cash and which are subject to an insignificant risk of changes in value.

#### *Financial Instruments Recognition, Initial Measurement and Derecognition*

Financial assets and financial liabilities are recognised when the Group becomes a party to the contractual provisions of the financial instrument.

Financial assets are derecognised when the contractual rights to the cash flows from the financial asset expire, or when the financial asset and substantially all the risks and rewards are transferred. A financial liability is derecognised when it is extinguished, discharged, cancelled or expires.

All financial assets are initially measured at fair value adjusted for transaction costs.

Financial assets, other than those designated and effective as hedging instruments, are classified into one of the following categories:

- amortised cost
- fair value through profit or loss ('FVTPL')
- fair value through other comprehensive income ('FVOCI').

In the period presented the Group does not have any financial assets categorised as FVTPL or FVOCI.

The Group's financial liabilities include derivative liabilities, borrowings and trade and other payables. Financial liabilities are initially measured at fair value, and, where applicable, adjusted for transaction costs unless the Group designated a financial liability to be accounted for at FVTPL.

Subsequently, financial liabilities are measured at amortised cost using the effective interest method except for financial liabilities at fair value through profit or loss, which are carried subsequently at fair value with gains or losses recognised in consolidated statement of profit or loss.

All derivative financial instruments are accounted for at FVTPL and the change in fair value are presented in the Statement of Profit or Loss. All interest-related charges are included within finance charges.

#### *Fair Values*

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within a three-level hierarchy, based on observability of significant inputs, as follows:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly; or
- Level 3: Unobservable inputs for the asset or liability. Inputs into the determination of the fair value require management judgment or estimation.

If different levels of inputs are used to measure a financial instrument's fair value, the classification within the hierarchy is based on the lowest level of input that is significant to the fair value measurement. Changes to valuation methods may result in transfers into or out of an investment's assigned level.

#### *Employee Entitlements*

Liabilities are recognized for short-term employee entitlements, on an undiscounted basis, for services rendered by employees that remain unpaid at each reporting date in the Consolidated Statement of Financial Position.

### *Current tax*

Current tax for each taxable entity in the Group is based on the local taxable income at the local statutory tax rate enacted or substantively enacted at the date of the Consolidated Statement of Financial Position and includes adjustments to tax payable or recoverable in respect of previous periods.

### *Deferred tax*

Deferred tax is recognized using the liability method in respect of all temporary differences between the tax bases of assets and liabilities, and their carrying amounts for financial reporting purposes, except as indicated below:

Deferred income tax liabilities are recognized for all taxable temporary differences, except:

- where the deferred income tax liability arises from the initial recognition of goodwill, or the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- in respect of taxable temporary differences associated with investments in subsidiaries, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax is measured on an undiscounted basis at the tax rates that are expected to apply in the periods in which the asset is realized or the liability is settled, based on tax rates and tax laws enacted or substantively enacted at the date of the Consolidated Statement of Financial Position.

### *Ordinary Share Capital*

Ordinary shares issued by the Company are recorded at the net proceeds received, which is the fair value of the consideration received less costs that are incurred in connection with the share issue.

### *Earnings per share*

Basic earnings per share is calculated by dividing the net profit or loss available to common shareholders by the weighted average number of common shares outstanding during the period.

Diluted earnings per share is calculated using the treasury method of calculating the weighted average number of common shares outstanding, except the if-converted method is used in assessing the dilution impact of convertible notes. The treasury method assumes that outstanding warrants with an average exercise price below the market price of the underlying shares are exercised and the assumed proceeds are used to repurchase common shares of the Company at the average price of the common shares for the period. The if-converted method assumes that all convertible notes have been converted in determining diluted earnings per share if they are in-the-money except where such conversion would be anti-dilutive.

### *Significant Judgements, Estimates & Assumptions*

The preparation of these consolidated financial statements requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, profit and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and further periods if it affects both current and future periods.

Estimates and assumptions where there is significant risk of material adjustments to assets and liabilities in future accounting periods include the recoverability and measurement of deferred tax assets, and provisions for restoration and environmental obligations.

The most significant judgements, estimates and assumptions used in the preparation of these consolidated financial statements include:

Judgements:

- Determination of functional currency of entities within the Group. Determining the appropriate functional currencies for each entity in the Group requires analysis of various factors, including the currencies and country-specific factors that mainly influence sales prices, and the currencies that mainly influence financing, labour, materials, and other costs of providing goods or services.
- The convertible notes (refer note 7) issued by the Group are complex with varying features which could, depending on judgements applied, result in a number of possible accounting treatments based on the application of IFRS. The main judgement made in determining the accounting treatment for the convertible notes is whether the notes should be split into multiple elements (i.e. base loan, warrants or interest) with a different accounting treatment for each element or treated as a single instrument meeting the definition of a derivative.
- Determine whether the Company remains a going concern as set out in commentary on the Going Concern on page 10.

Estimates:

- Assessment of whether the exploration and evaluation intangible asset is impaired. The future recoverability of the exploration and evaluation asset is dependent on a number of key factors such as gold price and determination of reserves. As the Group is only in the exploration phase of operations the Directors have used the fair value less costs to sell method using an income approach to test the exploration and evaluation asset for impairment. Fair value is estimated based on an associated enterprise value per resource ounce multiple methodology for relevant comparable companies in conjunction with an independent market assessment of the Company as a whole. The fair value methodology adopted is categorised as Level 3 in the fair value hierarchy.

The Directors have also taken into account impairment testing relying upon advice from an independent party who arrived at a pre-IPO asset value based on pre-IPO funding arranged by the Company and the proposed raising as part of an IPO and re-listing on the ASX. The testing used this asset value and other inputs that were appropriate at that time to arrive at a value of the asset. (Refer to Note 4)

- Fair value determination of financial instruments carried at fair value. Derivative financial instruments are recorded in the Consolidated Statement of Financial Position at values that are representative of or approximate their fair value. The fair value of derivatives requires application of the most appropriate valuation model which is dependent on the terms and conditions of the instrument.

For the year ended 30 June 2020 and 30 June 2019 the liabilities were valued using an income approach to calculate the fair value which incorporates both the timing and risk of receiving the expected payoff amounts. The valuation used estimates to determine the possible future outcomes, the timing and expected proceeds, with the expected proceeds discounted using a risk-adjusted discount rate with the resulting present value probability weighted to arrive at the fair value. The fair value methodology adopted is categorised as Level 3 in the fair value hierarchy. (Refer to Note 7).

#### 4. Exploration and evaluation

in USD	Year Ended 30 June 2020	Year Ended 30 June 2019
Opening Balance	17,506,422	50,771,582
Additions	-	4,840
Impairment	-	(33,270,000)
<b>Closing Balance</b>	<b>17,505,422</b>	<b>17,506,422</b>
Cost	50,776,422	50,776,422
Accumulated impairment	(33,270,000)	(33,270,000)
<b>Closing Balance</b>	<b>17,506,422</b>	<b>17,506,422</b>

The exploration and evaluation asset is entirely comprised of the Bau Gold Project, a brown-field project, spread over a large geographic area.

The Company is in a consortium with a Malaysian company with Bumiputra interests that owns rights to consolidated mining tenements covering much of the historic Bau Goldfield in Sarawak, East Malaysia.

The Bau Gold Project comprises consolidated mining and exploration tenements that collectively cover more than 1,340km<sup>2</sup>. A feasibility study for Stage 1 of the Bau Gold Project in East Malaysia was completed in the financial year ended 30 June 2014.

A potential impairment occasioned by the potential revocation of four mining licenses to facilitate the establishment of the Dered Krian National Park ("Park") has a near-term adverse impact upon Bau, however the bulk of the resources and reserve reduction remain external to the Park, so much of these potential reductions will be preserved under an excision proposal or new tenement applications if required.

During the last financial year the Directors examined the viability of relisting the Company on a stock exchange and during this process it became clear that it was not possible for the Company to achieve the previous valuation outcomes. The Directors therefore performed an impairment test and determined the recoverable amount of the asset at its fair value less costs of disposal, relying on advice from an independent party which concluded that the Enterprise Value (EV) of the Company at 30 June 2019 based on a pre-IPO valuation was \$17.5 million. As the Company only has a single asset, the use of an EV was considered an appropriate indicator for the value of the asset. This opinion was based on the value of the asset on an EV per ounce basis discounted for their assessment of the sovereign risk-taking and the likely institutional market uptake of the IPO offering and takes into account pre-IPO funding arranged by the Company, and the proposed raising of approximately \$5.6 - \$7.0 million as part of an IPO that involves the Company re-listing on the ASX that should take place prior to November 2020. This process ascribed an asset value of approximately \$17.5 million on a debt free basis. Any change in the IPO pricing will result in a corresponding direct change in the underlying asset value. As a result, the Directors have concluded that it was necessary for the Group to impair the carrying value of Bau for the year ended 30 June 2019 by an amount of \$33,270,000 reducing the value of the asset to \$17,506,422. A review for the year ended 30 June 2020 indicated no significant change to facts and circumstances which would suggest that a further reduction to the carrying value is necessary. Therefore, management and the Directors conclude that no impairment is required for 30 June 2020.

## 5. Trade and other payables

in USD	Year Ended 30 June 2020	Year Ended 30 June 2019
Trade payables	2,280,296	2,711,582
Taxes and government fees	21,433	29,957
Accruals and other payables	3,315,413	2,341,489
<b>Total</b>	<b>5,617,142</b>	<b>5,083,028</b>

## 6. Loans and borrowings

in USD	Year Ended 30 June 2020	Year Ended 30 June 2019
<b>Current Liabilities</b>		
Secured convertible notes	529,530	-
Other current indebtedness (unsecured)	1,485,536	1,433,637
<b>Total</b>	<b>2,015,066</b>	<b>1,433,637</b>

### *Other Current Indebtedness (Unsecured)*

#### North Borneo Gold Debt Notes

North Borneo Gold Debt Notes (“NBG Debt Notes”) carried at \$425,639 in 2020 (2019: \$414,046), have a term of four (4) years to November 2020, bear interest of three percent (3%) per annum, calculated and payable on maturity.

#### Advances

Clients of Novus Capital have made unsecured advances of \$850,702 (2019: \$800,821) for working capital. They are repayable on demand and have an interest rate of 12% per annum payable on maturity.

#### *Secured convertible notes*

On 31 October 2019, the Company closed a CAD\$500,000 financing which consisted of the issuance of a zero-coupon secured convertible note (the “Convertible Note”) in the principal amount of CAD\$500,000. The Convertible Note has a maturity date of 30 June 2020 at such date the amount payable is 125% of the principal owed.

At the option of the holder, the Convertible Note is convertible into Common Shares upon the occurrence of a transaction resulting, directly or indirectly, in the relisting of the Common Shares on a specified stock exchange at a conversion price depending on the nature of the transaction equal to either the Resource Conversion Rate or equal to 55% of the price per Common Share at which the Company issues Common Shares in a financing occurring contemporaneously or in connection with such transaction.

The conversion feature is considered an embedded derivative which is normally fair valued and recognised separately from the host financial liability, however, as of 30 June 2020, upon maturity of the note, the conversion rights have also expired and therefore has nil value. Also, at inception, due to the short-term nature of the note, the derivative is not considered material.

The Company’s obligations under the Convertible Note were secured by a general security agreement in favour of the holder of the Convertible Note ranking subordinate to the existing secured obligations of the Company.

The Holder, subsequent to balance date, directed the Company to pay all money owed to it under the 31 October 2019 convertible note, as subscription funds to the new capital raising that closed in July 2020 as disclosed in Note 18.

The Company also received AUD\$100,000 in June 2020 which formed part of the AUD\$2,500,000 capital raising of zero-coupon secured convertible subordinated notes (the 'Convertible Notes') which closed after balance date (refer Subsequent Event Note 18).

The Company's obligations under the Convertible Notes are secured by a general security agreement in favour of the holders of the Convertible Notes ranking subordinate to the existing secured obligations of the Company.

The Convertible Notes mature 30 November 2020 and are convertible at the option of the holders into common shares of the Company at a price of AUD\$0.10 per Common Share, on a post consolidation basis (*Note: the consolidation being on the basis set out in the Company's Management Information Circular dated 11 August, 2020. Refer to Note 18 for additional disclosure relating to the consolidation of shares*) and convert automatically upon the occurrence of a transaction resulting, directly or indirectly, in the relisting of the Common Shares on a specified stock. Similar to the CAD\$500,000 note, the conversion feature is also an embedded derivative, however, due to the short-term nature of the note, the fair value of the derivative, at inception and at 30 June 2020, is not considered material.

## 7. Derivative Liabilities

in USD	Year Ended 30 June 2020	Year Ended 30 June 2019
<b>Current Liability:</b>		
Convertible notes (secured)	1,977,972	1,535,158
Exit financing note (secured)	9,347,263	7,064,016
Creditor convertible notes (unsecured)	131,226	-
	11,456,461	8,599,174
<b>Non-current liability:</b>		
Creditor convertible notes (unsecured)	-	2,415,009
<b>Total</b>	<b>11,456,461</b>	<b>11,014,183</b>

For the years ended 30 June 2020 and 2019, the derivative liabilities were valued using an income approach to calculate the fair value which incorporates both the timing and risk of receiving the expected payoff amounts. The valuation used estimates to determine the possible future outcomes, the timing and expected proceeds, with the expected proceeds discounted using a risk-adjusted discount rate with the resulting present value probability weighted to arrive at the fair value. The fair value methodology adopted is categorised as Level 3 in the fair value hierarchy.

The main inputs into the valuation were

- the security held by the noteholders (refer below),
- the expected proceeds from an IPO of approximately \$5.6 - \$7.0 million, and
- using a discount rate between 25% to 30%

The sensitivity analysis based on the expected proceeds of \$7 million with a variance in the discount rate of +/- 5% results in a value range of +/- \$350,000.

For the year ending 30 June 2019 the main inputs into the valuation were

- the security held by the noteholders (refer below),
- the expected proceeds from an IPO of \$7 million, and
- using a discount rate between 25% to 30%

The sensitivity analysis based on the expected proceeds of \$7 million with a variance in the discount rate of +/- 5% results in a value range of +/- \$350,000.

### *Convertible Notes (Secured)*

The Convertible Note (“InCoR Note”) was issued to InCoR Limited (“InCoR”) pursuant to a partial revocation of the Cease Trade Order (“CTO”) granted by the Ontario Securities Commission on 15 March 2015, with drawdowns under this note facility commencing in September 2014 and continuing until April 2015, when the balance of the note reached CAD \$2,000,000. The two-year interest coupon (at 6% per annum) on the InCoR Note was prepaid by the Company from the proceeds received from the InCoR Note.

The InCoR Note is convertible into Common Shares in the Company at a price of CAD \$0.01 per Common Share at the option of the holder or will convert in full into CAD \$0.01 equity when the CTO lifts. Warrants associated with the note (1/3 warrant coverage, with 5-year terms at a strike price of CAD \$0.02) are only issued once the InCoR Note converts, and common shares are issued to the holder. The InCoR Note matured in November 2018 when all the CTOs were revoked. As the InCoR Note has matured it is currently convertible at the option of the holder or (amongst other things) the occurrence of a Liquidity Event such as an equity financing.

A further advance of CAD\$100,000 was made in January 2018 on which date the interest rate under the InCoR Note increased to 12%. All other terms under the InCoR Note remain unchanged. The obligations under the InCoR Note are secured by joint and several guarantees by subsidiaries of the Company and a pledge to it of the shares held by those subsidiaries in North Borneo Gold (the project company operating the Bau Gold Project). These securities were subordinated to the securities held by Pangaea Holdings Limited (“Pangaea”) pursuant to the Exit Financing.

The InCoR Notes are denominated in Canadian dollars. The functional reporting currency of the Company is US dollars. As the exercise price of the Common Shares and resulting warrants underlying the conversion feature is denominated in Canadian dollars and is not denominated in the Company’s functional currency, the contractual obligations arising from the conversion feature meet the definitions of a derivative in its entirety under IFRS.

The legal amount owing on the note at 30 June 2020 is CAD\$2,872,942 (2019: CAD\$2,616,483).

### *Exit Financing Note (Secured)*

Pangaea Holdings Limited (“Pangaea”) subscribed CAD\$10,000,000 to the Company in November 2016, pursuant to a partial revocation of the CTO, granted by the OSC on 16 November 2016.

Pursuant to a Securities Purchase Agreement between Pangaea and the Company, Pangaea was issued a secured convertible note (“Convertible Note”) convertible at a price of CAD\$0.01 into one common share (each a “Common Share” and, collectively, the “Common Shares”) of the Company and one-third of a warrant to purchase Common Shares of the Company, each whole warrant entitling Pangaea to purchase one Common Share at an exercise price of CAD\$0.02 for a term of five years from the date of issuance.

The Convertible Note matures on 17 November 2021, unless earlier converted in accordance with its terms. The Convertible Note is convertible at the option of Pangaea or converts automatically upon the earlier of the maturity date or the date of listing of the Common Shares on one or more specified stock exchanges. Interest on the Convertible Note is at the rate of 5% per annum payable annually in cash or in Common Shares at a rate of CAD\$0.01 per Common Share. As a condition of Pangaea consenting to further InCoR advances the interest rate under the Convertible Note increased from 5% to 12% from January 2018.

The obligations of the Company under the Convertible Note are secured by a general security agreement over the Company’s assets and by share pledge arrangements. As noted above InCoR subordinated its security interests to those of Pangaea.

Pangaea was also issued warrants to purchase 333,333,333 Common Shares at an exercise price of CAD\$0.02 for a term of five years from the date of issuance.

In order to vest Pangaea with voting control of the Company pending conversion of the Convertible Note, Pangaea was issued Common Shares representing 50.1% of the voting rights of Besra's issued and outstanding Common Shares. Such Common Shares have been deposited with an escrow agent pursuant to a common share escrow agreement which provides Pangaea with the voting rights in respect of such shares but not economic or other rights in respect thereof. Further, as Common Shares are issued to Pangaea, whether by conversion of the Convertible Note or otherwise, Common Shares subject to this escrow arrangement will be redeemed for a nominal amount such that the escrowed Common Shares will not cause Pangaea's voting rights to exceed 50.1%. All remaining Common Shares subject to such escrow arrangement will be redeemed for a nominal sum upon conversion or repayment of the Convertible Note in its entirety.

The Convertible Notes are denominated in Canadian dollars. The functional reporting currency of the Company is US dollars. As the exercise price of the Common Shares and resulting warrants underlying the conversion feature is denominated in Canadian dollars and is not denominated in the Company's functional currency, the contractual obligations arising from the conversion feature meet the definitions of a derivative in its entirety under IFRS.

The exit financing note is subject to ongoing breaches which is considered by Pangaea to be Events of Default. Pangaea has confirmed they will continue to forbear acting on the default provided Besra completes its plans to relist as contemplated under the Canaccord mandate or some other proposal that may otherwise arise. Historically, Pangaea have levied an additional fee for continued forbearance in respect to this matter and confirmed that they expect to levy a charge in respect to the 2020 financial years breach. While Pangaea have confirmed a fee will be charged, the amount is yet to be confirmed. In 2019, the fees \$1,374,245 were accounted for..

The legal amount owing on the note at 30 June 2020 is CAD\$13,513,151 (2019: CAD\$12,322,778).

#### *Creditor convertible notes (Unsecured)*

The Creditors Notes ("New Notes") were issued on 17 November 2016 and are unsecured with the following material terms:

- (i) each New Note shall be issued at the New Note Value;
- (ii) each New Note shall have a term of four (4) years to November 2020;
- (iii) each New Note shall bear interest at a rate of three percent (3%) per annum, calculated and payable on maturity;
- (iv) each New Note shall be redeemable, at the Company's option, as follows:
  - a. between months 43 to 48 (inclusive), at 100% of the Adjusted New Note Value, including accrued interest; and

to the extent it has not been wholly redeemed, each New Note shall be convertible at the New Note Value or any part thereof outstanding, at the noteholder's option on a semi-annual basis, into common shares of the Company at the conversion price of C\$0.085 per share (only full shares will be issued; no fractional shares will be issued).

The Creditor Convertible Notes are denominated in Canadian dollars. The functional reporting currency of the Company is US dollars. As the exercise price of the Common Shares is denominated in Canadian dollars and is not denominated in the Company's functional currency, the contractual obligations arising from the conversion feature meet the definitions of a derivative in its entirety under IFRS.

The legal amounts owing on the note at 30 June 2020 is CAD\$52,516,867 (2019: CAD\$51,124,850).

## 8. Income Tax

The significant components of income tax expense were:

in USD	Year Ended 30 June 2020	Year Ended 30 June 2019
(Loss) Profit before income tax	(1,538,822)	(29,838,550)
Expected tax recovery at 26.5%	(407,788)	(7,907,216)
Non-deductible/assessable items	147,197	(1,423,156)
Benefit of current year loss not recognized	260,591	1,992,145
<b>Actual tax (recovery)</b>	<b>-</b>	<b>(7,338,227)</b>
<b>Tax recovery comprises:</b>		
Current tax:		
Based on taxable income for the current year	-	-
Deferred tax:		
Origination and reversal of temporary differences	-	7,338,227
<b>Total tax recovery</b>	<b>-</b>	<b>7,338,227</b>

### *Unrecognized Tax Losses/Unrecognised Deductible Temporary Differences*

The Group has unrecognized deferred tax assets in relation to tax losses that are available to carry forward against future taxable income of the companies in which the losses arose. Deferred tax assets have not been recognized in respect of these losses as they may not be used to offset taxable profits elsewhere in the Group and they have arisen in entities for which it is not probable that there will be taxable profits in the future. The tax losses for Canada are \$65,120,916 (2019: \$64,137,554) which will expire twenty years after the loss was incurred.

### *Deferred Tax*

The deferred tax liabilities included on the face of the Consolidated Statement of Financial Position are as follows:

in USD	Year Ended 30 June 2020	Year Ended 30 June 2019
<b>Deferred Tax Liabilities</b>		
Exploration & Evaluation Properties	-	-
<b>Total Deferred Tax Liabilities</b>	<b>-</b>	<b>-</b>
<b>Deferred Tax Recovery</b>		
Exploration & Evaluation Properties	-	7,338,227
<b>Total Deferred Tax Recovery</b>	<b>-</b>	<b>7,338,227</b>

Deferred tax liabilities denominated in foreign currencies are retranslated at reporting period end exchange rates.

## 9. Issued Capital & Reserves

### Common Shares

The Company is authorized to issue an unlimited number of common shares with one vote per share and no-par value per share.

in USD	Number of Common Shares	Amount
Balance 30 June 2018	1,204,892,898	141,517,358
Shares issued	-	-
Balance 30 June 2019	1,204,892,898	141,517,358
Shares Issued	-	-
<b>Balance 30 June 2020</b>	<b>1,204,892,898</b>	<b>141,517,358</b>

In order to vest Pangaea with voting control of the Company pending conversion of the Convertible Note, Pangaea was issued Common Shares representing 50.1% of the voting rights of Besra's issued and outstanding Common Shares. Such Common Shares have been deposited with an escrow agent pursuant to a common share escrow agreement which provides Pangaea with the voting rights in respect of such shares but not economic or other rights in respect thereof. (Refer note 7 for details of Exit Financing Note).

### Investment Premium Reserve

in USD	Investment Premium Reserve	Total
Balance at 30 June 2019	(20,563,257)	(20,563,257)
<b>Balance at 30 June 2020</b>	<b>(20,563,257)</b>	<b>(20,563,257)</b>

This reserve represents the premium paid on acquisition of a greater equity interest in NBG. The premium arose due to the fair value adjustment of the carrying value of the interest in NBG acquired through the Group's merger with Zedex Minerals in fiscal 2010.

## 10. Finance Charges

in USD	Year Ended 30 June 2020	Year Ended 30 June 2019
Interest on borrowings and notes	132,190	39,049
Finance expense	-	1,424,245
Foreign exchange loss (gain)	(68,282)	36,304
<b>Total finance charges</b>	<b>63,908</b>	<b>1,499,598</b>

## 11. Earnings (Loss) Per Share

in USD	Year Ended 30 June 2020	Year Ended 30 June 2019
<b>Basic loss per share attributable to Equity Owners:</b>		
(Loss) for the period	(1,538,822)	(18,863,527)
Weighted average number of common shares outstanding	4,819,572	4,819,572
<b>Basic (loss) per share</b>	<b>(0.319)</b>	<b>(3.914)</b>

Basic earnings (loss) per share is calculated by dividing the net profit (loss) for each reporting period attributable to the equity owners of Besra by the weighted average number of common shares outstanding for the period.

Diluted (loss) earnings per share is based on basic earnings (loss) per share adjusted for the potential dilution if shares held in escrow are transferred 5,651,228 (2019: 5,651,228) and warrants are exercised 1,333,333 (2019: 1,333,333). The increase in the number of shares from conversion of convertible debt is dilutive as they would decrease the loss per share attributable to equity owners.

## 12. Reconciliation of liabilities arising from financing activities

The changes in the Group's liabilities arising from financing activities can be classified as follows:

Year ended 30 June 2020

in USD	Short term Borrowings	Derivatives	Total
Opening balances	1,433,637	11,014,183	12,447,820
<b>Cash flows</b>			
Proceeds	437,729	-	437,719
Repayments	(88,173)	-	(88,173)
<b>Non-cash</b>			
Accrued interest	231,873	-	231,873
Adjustment to fair value	-	442,278	442,278
<b>Balance 30 June 2020</b>	<b>2,015,066</b>	<b>11,456,461</b>	<b>13,471,527</b>

Year ended 30 June 2019

in USD	Short term Borrowings	Derivatives	Total
Opening balances	592,918	17,808,829	18,401,747
<b>Cash flows</b>			
Proceeds	829,009	-	829,009
<b>Non-cash</b>			
Interest accrued	11,710	-	11,710
Adjustment to fair value	-	(6,794,646)	(6,794,646)
<b>Balance 30 June 2019</b>	<b>1,433,637</b>	<b>11,014,183</b>	<b>12,447,820</b>

## 13. Related Party Disclosure

Related Parties of the Group are Pangaea as an entity with Significant Influence, Key Management Personnel and InCoR as the entity with Common Directors who are deemed to have a significant influence over the Group. The following Related Party amounts are recognized in the consolidated financial statements of the Group:

*Entity with Significant Influence*

in USD	Year Ended 30 June 2020	Year Ended 30 June 2019
Derivative liability	9,347,263	7,064,016
Financing charges	-	1,424,245
Finance charges payable	(1,424,215)	(1,424,245)

## Key Management

in USD	Year Ended 30 June 2020	Year Ended 30 June 2019
Directors fees and management fees	380,000	397,343
Amounts payable	1,050,048	865,390

## Entities with Common Directors Who Have Significant Influence

in USD	Year Ended 30 June 2020	Year Ended 30 June 2019
Consultancy fees expense	-	125,827
Interest-bearing loan	62,796	100,000
Derivative liability	1,977,972	1,535,156
Interest	12,796	27,219
Consultancy fees payable	116,113	189,041

## 14. Commitments, Contingencies and Contractual Obligations

### *Contractual Commitments: Acquisition of Interest in NBG*

In 2010 the Company entered into an agreement with Gladioli Enterprises Sdn Bhd ("Gladioli"), as amended on 20 May 2011 and 20 January 2012 and amended and restated on 12 May 2013, to acquire additional interests in NBG to take the Company's equity-adjusted interest to 93.55% by September 2015, subject to payments totalling \$35,000,000 to be made in several tranches. As at November 2016, \$7,600,000 remained outstanding.

In November 2016 the Company entered into an amended acquisition agreement with Gladioli, with the terms summarised as follows:

Further payments will be made as follows to Gladioli:

- with respect to the Tranche Four B Shares, CAD\$500,000 was paid on 30 June 2017;
- CAD\$750,000 less an amount equal to MYR111,150 retained by the Company in repayment of a Gladioli loan upon lifting of the CTO;
- with respect to the Tranche Four C Shares, CAD\$1,250,000 on the tenth Business Day following a Qualified Financing (defined as "an issuance from treasury of common shares of Besra at a price per share of not less than CAD\$0.02 and resulting in gross proceeds to Besra of at least CAD\$5,000,000") provided that if there is no Qualified Financing prior to the settlement of the Tranche Four C Shares, then the settlement date for the Tranche Four C Shares shall be the same date as the settlement date for the Tranche Four D Shares; and
- with respect to the Tranche Four D Shares, CAD\$3,500,000, plus common shares of Besra at a price per common share equal to the Listing Price having an aggregate value of CAD\$2,000,000 on the tenth Business Day after the date of the Relisting.

The balance of commitments in respect of the acquisition of a further interest in NBG at 30 June 2020 are payments totalling \$4,212,439 and shares to a value of \$1,541,200 (2019: payments totalling \$4,212,439 and shares to a value of \$1,541,200)

### *Contingencies*

By their nature, contingencies will only be resolved when one or more uncertain future events occur or fail to occur.

The assessment of contingencies inherently involves the exercise of significant judgment and estimates of the outcome of future events.

#### *Contingencies - Legal Actions*

In the normal course of business, the Group may be subject to legal claims. Provisions are recorded where claims are likely and estimable, and at 30 June 2020 and 30 June 2019, no provisions have been recorded nor are any legal actions outstanding.

## **15. Financial Instruments & Risk Management**

### *Risk Management*

The Group's activities expose it to a variety of risks:

- interest rate risk;
- liquidity risk
- commodity price risk;
- foreign exchange risk; and
- credit risk.

The risks listed arise from exposures that occur in the normal course of business and are managed by the Officers of the Company. Material risks are monitored and discussed with the Audit Committee of the Board of Directors

#### *Interest rate risk*

The Group has borrowings which attract fixed rate interest. There is no further risk of the interest rate increasing for these convertible notes as the rates are fixed.

There is no sensitivity to interest rates.

#### *Liquidity Risk*

Liquidity risk arises through excess financial obligations over available financial assets at any point in time. The Group's objective in managing liquidity risk is to maintain sufficient readily available cash reserves in order to meet its liquidity requirements at any point in time.

During the year ended 30 June 2020, the Group was dependent on the ongoing support of its financiers, referred to in Note 3 above.

The tables below summarize the maturity profile of the Group's derivatives and financial liabilities based on contractual undiscounted payments and including estimated interest.

As at 30 June 2020:

in USD	Within 1 Year	1-5 Years
Other borrowings	2,015,066	-
Trade and other payables	5,617,142	-
	7,632,208	-
Financial derivatives	11,456,461	-
<b>Total</b>	<b>19,088,669</b>	-

As at 30 June 2019:

in USD	Within 1 Year	1-5 Years
Other borrowings	1,433,637	-
Trade and other payables	5,083,028	-
	6,516,665	-

#### *Commodity Price Risk*

The performance of the Group is significantly related to the market price of gold.

In assessing the carrying values of the assets and liabilities, the effect of changes in the commodity price for gold was considered, where applicable, and reflected accordingly in the balances shown in the Consolidated Statement of Financial Position of the Group.

The Group does not have current operations producing gold, and therefore does not actively engage in any hedging of Commodity Price Risk.

#### *Foreign Exchange Risk*

The Group operates in Canada, Malaysia and New Zealand.

The functional and reporting currency of the parent company is the US dollar. The functional currency of significant subsidiaries is also US dollars. The subsidiaries transact in a variety of currencies but primarily in the US dollar, Canadian dollar, New Zealand dollar and Malaysian ringgit.

The most significant transaction exposure arises in the related party in Canada.

The statement of financial position of the Group includes US and Canadian dollar cash and cash equivalents, and convertible notes in Canadian dollars. The Group is required to revalue the US dollar equivalent of the Canadian dollar cash and cash equivalents and liability at each period end.

Foreign exchange gains and losses from these revaluations are recorded in the Consolidated Statement of Profit and Loss and Other Comprehensive Income.

At present, the Group does not hedge foreign currency transaction or translation exposures. The currency sensitivity analysis is based on the following assumptions:

- differences resulting from the translation of financial statements of subsidiaries or joint ventures into the Group's presentation currency, US\$, are not taken into consideration; and
- the major currency exposures for the Group relate to the US\$ and local currencies of subsidiaries and joint ventures. Foreign currency exposures between two currencies where one is not the US\$ are deemed insignificant to the Group and have therefore been excluded from the sensitivity analysis. If the USD had strengthened by 5% (2019: 5%) then this would have had the following impact:

in USD	Year Ended 30 June 2020	Year Ended 30 June 2019
Loss (Profit) for the year	(54,827)	(94,553)

If the USD had weakened by 5% (2019: 5%) then this would have had the following impact:

in USD	Year Ended 30 June 2020	Year Ended 30 June 2019
(Loss) Profit for the year	(54,827)	(94,553)

#### *Credit Risk*

Credit risk arises from cash held with banks and financial institutions. The maximum exposure to credit risk is equal to the carrying value of the cash. The objective of managing counterparty credit risk is to prevent losses in financial assets.

The Group assesses the credit quality of the counterparties, taking into account their financial position, past experience and other factors.

No financial assets of the Group are considered past due or impaired (2019: Nil).

#### *Capital Management*

The objective of the Group's capital management is to safeguard the entity's ability to continue as a going concern which is dependent on the Company's management:

- Completing the filings and lodgements with the OSC and other regulators as applicable to bring the Company up to date with filing compliance, have the CTO revoked to enable the Group to secure further working capital funding;

The Company continually assesses the adequacy of its capital structure and makes adjustments within the context of its strategy, the mineral resources industry, economic conditions and the risk characteristics of our assets.

The Group manages its capital structure by performing the following:

- Preparing detailed budgets, by project, that are approved by the Board for development, exploration, acquisition and corporate costs;
- Routine internal reporting and Board meetings to review actual versus budgeted spending; and
- Detailed financial analysis to determine new funding requirements.

The Group considers its capital structure to consist of interest-bearing loans and borrowings net of cash and cash equivalents and equity (which includes non-controlling interests). Total managed capital is as follows:

in USD	Year Ended 30 June 2020	Year Ended 30 June 2019
Cash	(31,260)	(22,467)
Interest-bearing loans and borrowings	2,015,066	1,433,637
Derivative liabilities	11,456,461	11,014,183
Net debt	13,440,267	12,425,353
Shareholders' equity	(1,482,755)	56,067
	11,957,512	12,481,420

### Financial Instruments

The fair value of interest-bearing loans and borrowings approximated the carrying value at 30 June 2020 and 30 June 2019 due to market rates of interest and the consistency of credit spread. All other fair values of financial instruments except for derivatives approximate their carrying values due to their short-term nature.

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates are subjective in nature and involve uncertainties and matters of significant judgement and, therefore, cannot be determined with precision. Changes in assumptions could significantly affect the estimates. The fair value of the derivative liabilities was determined using level 3 Inputs as described in Note 3 *Significant Judgements, Estimates & Assumptions*.

## 16. Segment Reporting

The operations of Besra consist of one business unit, a sole gold exploration and development project in Malaysia with no current revenue and therefore management has deemed there to be only one reportable segment as disclosed for the 2020 and 2019 financial years. As such no additional segment reporting disclosures have been made.

## 17. Employee Remuneration

in USD	Year Ended 30 June 2020	Year Ended 30 June 2019
Wages, salaries	380,000	397,343

## 18. Events After the Reporting Date

On 7 July 2020 the Company closed an AUD\$2,533,000 financing consisting of zero-coupon secured convertible subordinated notes ("Convertible Notes" and "Convertible Financing Notes").

The Convertible Notes mature 30 November 2020 and are convertible at the option of the holders into Common Shares of the Company at a price of AUD\$0.10 per Common Share, on a post consolidation basis, as disclosed below, and convert automatically upon the occurrence of a transaction resulting, directly or indirectly, in the relisting of the Common Shares on a specified stock exchange.

The Company's obligations under the Convertible Notes are secured by a general security agreement in favour of the holders of the Convertible Notes ranking subordinate to the existing secured obligations of the Company.

Included within the Convertible Note Financing, the Company has replaced a convertible secured note principal amount of CAD\$500,000 issued 31 October 2019. The AUD\$100,000 received by the Company in June 2020 also forms part of this capital raising.

On 10 September 2020, at the Annual and Special Meeting of Shareholders, a special resolution was passed approving a consolidation of the shares on the basis of two-hundred fifty (250) pre-consolidation shares for one (1) post-consolidation shares of the Company. A consolidation was considered necessary to meet the minimum listing price on a major stock exchange.

The consolidation will have the following effects on the current share capital of the Company:

- (a) the number of Shares of the Company issued and outstanding will be reduced on the basis of the Consolidation Ratio;
- (b) the number of Shares of the Company issuable upon the conversion or exercise of outstanding warrants, options and other similar instruments of the Company will be reduced proportionately based on the Consolidation Ratio with corresponding adjustments, where applicable, to the exercise or conversion price of such instruments;
- (c) the number of Shares reserved for issuance under the Company's Stock Option Plan will be reduced proportionately based on the Consolidation Ratio.

The reported basic earnings (loss) per share and diluted (loss) earnings per share reported in the financial statements for 2020 and 2019 have been adjusted to reflect the consolidation of shares.

There have been no other significant events after the reporting date.

## 19. Covid-19

The current Covid-19 pandemic has impacted on the financial affairs of the Company and is expected to have a short to medium term impact. The financial impact may

- (a) result in logistical challenges in the impending capital raising that could cause delays in receiving the planned funding,
- (b) result in uncertainties in the amount and timing of the capital raising as a result of the impact on investors and the stock market, and
- (c) result in changes to the general economic outlook.

## 20. Changes in Accounting Policies, New Standards and Interpretations

The Group has adopted the following new accounting pronouncements this year.

### New or revised Standards or Interpretations

#### IFRS 16 "Leases"

IFRS 16 'Leases' replaces IAS 17 'Leases' along with three Interpretations (IFRIC 4 'Determining whether an Arrangement contains a Lease', SIC 15 'Operating Leases-Incentives' and SIC 27 'Evaluating the Substance of Transactions Involving the Legal Form of a Lease').

Before the adoption of NZ IFRS 16, the Group classified each of its leases (as lessee) at the inception date as either a finance lease or an operating lease. A lease was classified as a finance lease if it transferred substantially all of the risks and rewards incidental to ownership of the leased asset to the Group; otherwise it was classified as an operating lease. Finance leases were capitalized at the commencement of the lease at the inception date fair value of the leased property or, if lower, at the present value of the minimum lease payments. Lease payments were apportioned between interest (recognized as finance costs) and reduction of the lease liability. In an operating lease, the leased property was not capitalized and the lease payments were recognized as rent expense in profit or loss within the statement of comprehensive income on a straight-line basis over the lease term. Any prepaid rent and accrued rent were recognized under Prepayments and Trade and other payables, respectively. Upon adoption of IFRS 16, the Group applied a single recognition and measurement approach for all leases that it is the lessee, except for short-term leases and leases of low-value assets.

The Group has no leases with a term greater than 12 months at 1 July 2019 and, as such, there is no impact on the financial statements from adopting this standard.

#### IFRIC 23 Uncertainty over Income Tax Treatments issued

IFRIC 23 clarifies the accounting for uncertainties in income taxes. The interpretation is to be applied to the determination of taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates, when there is uncertainty over income tax treatments under IAS 12.

An entity has to consider whether it is probable that the relevant authority will accept each tax treatment, or group of tax treatments, that it used or plans to use in its income tax filing.

If the entity concludes that it is probable that a particular tax treatment is accepted, the entity has to determine taxable profit (tax loss), tax bases, unused tax losses, unused tax credits or tax rates consistently with the tax treatment included in its income tax filings. If the entity concludes that it is not probable that a particular tax treatment is accepted, the entity has to use the most likely amount or the expected value of the tax treatment when determining taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates. The decision should be based on which method provides better predictions of the resolution of the uncertainty.

Given the current operational state of the Group, there are no significant uncertainties as to tax treatments taken.

### **New IFRS standards and interpretations issued but not yet adopted**

At the date of authorisation of these financial statements, several new, but not yet effective, Standards and amendments to existing Standards, and Interpretations have been published by the IASB and XRB. None of these Standards or amendments to existing Standards have been adopted early by the Group.

Management anticipates that all relevant pronouncements will be adopted for the first period beginning on or after the effective date of the pronouncement. New Standards, amendments and **Interpretations** not adopted in the current year have not been disclosed as they are not expected to have a material impact on the Group's financial statements.

## 21. Authorization of Consolidated Financial Statements

The consolidated financial statements for the year ended 30 June 2020 including comparatives were approved by the board of directors on 28 October 2020.
