

## **MANAGEMENT'S DISCUSSION AND ANALYSIS ("MD&A")**

**For the 6 months ended 31 December 2021**

### **MD&A**

The following MD&A provides a narrative from Management's perspective of how Besra Gold Inc ("Group" or "Besra") has performed over the six months ending 31 December 2021 of the 2022 financial year, including its financial condition and its future prospects. This MD&A has been prepared by Management in compliance with the requirements of section 2.2.1 "Quarterly Highlights" of Form 51-102F1, is current as at 31 December 2021 and has been approved on 1 March 2022 by the Audit Committee (and Board of Directors) of the Company.

This MD&A both supplements and complements the Group's Condensed Interim Consolidated Financial Statements for the 6 months ending 31 December 2021. All amounts quoted are denominated in USD unless otherwise stated.

### **Forward Looking Information**

This MD&A contains "forward-looking information" within the meaning of Canadian securities legislation and "forward looking statements" within the meaning of the United States Private Securities Litigation Reform Act of 1995 (collectively, "forward-looking statements").

All statements, other than statements of historical fact, which address activities, events, or developments that the Group believes, expects or anticipates will or may occur in the future are forward-looking statements.

Forward-looking statements contained in this MD&A include, but are not limited to, statements with respect to anticipated developments in the Group's continuing and future operations, the adequacy of the Group's financial resources and financial projections; statements concerning, or the assumptions related to, the estimation of mineral resources, methodologies and models used to prepare resource estimates; the conversion of mineral properties to resources; the potential to expand resources; future exploration budgets, plans, targets and work programs; development plans; activities and timetables; metal grades; metal prices; exchange rates; results of drill programs; environmental risks; political risks and uncertainties; unanticipated reclamation expenses; statements about the Group's plans for its mineral properties; acquisitions of new properties and the entering into of options or joint ventures; and other events or conditions that may occur in the future.

Forward-looking statements are frequently, but not always, identified by words such as "expects," "anticipates," "believes," "intends," "estimated," "potential," "possible" and similar expressions, or statements that events, conditions, or results "will," "may," "could" or "should" occur or be achieved.

Forward-looking statements are statements concerning the Group's current beliefs, plans and expectations about the future and are inherently uncertain, and actual achievements of the Group or other future events or conditions may differ materially from those reflected in the forward-looking statements due to a variety of risks, uncertainties, and other factors, including, without limitation, the risks that:

- (i) any of the assumptions in the resource estimates turn out to be incorrect, incomplete, or flawed in any respect;
- (ii) the methodologies and models used to prepare the resource estimates either underestimate or overestimate the resources due to hidden or unknown conditions;
- (iii) operations are disrupted or suspended due to acts of God, pandemics, internal conflicts in the country of Malaysia, unforeseen government actions or other events;
- (iv) the Group experiences the loss of key personnel;
- (v) the Group's site operations are adversely affected by other political or military, or terrorist activities;
- (vi) the Group becomes involved in any material disputes with any of its key business partners, lenders, suppliers, or customers; or
- (vii) the Group is subjected to any hostile takeover or other unsolicited attempts to acquire control of the Group.

Other factors that could cause the actual results to differ materially from current expectations include market prices, exploration success, continued availability of capital and financing, inability to obtain required regulatory approvals and general market conditions, as well as those risks described below under the heading "RISKS AND UNCERTAINTIES".

These forward-looking statements are based on a number of assumptions, including assumptions regarding general market conditions, the timing and receipt of regulatory approvals, the ability of the Group and other relevant parties to satisfy regulatory requirements, the availability of financing for proposed transactions and programs on reasonable terms and the ability of third-party service providers to deliver services in a timely manner.

The Group's forward-looking statements are based on the beliefs, expectations and opinions of management on the date the statements are made, and the Group assumes no obligation to update such forward-looking statements in the future, except as required by law.

There can be no assurance that such statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. For the reasons set forth above, investors should not place undue reliance on the Group's forward-looking statements.

## **Other Disclosure**

The following discussion of performance, financial condition and future prospects should be read in conjunction with the consolidated audited financial statements for the year ended 30 June 2021 and notes thereto ("Financial Statements"), which have been prepared in accordance with International Financial Reporting Standards ("IFRS"), as issued by the International Accounting Standards Board ("IASB"). The information provided herein supplements, but does not form part of, the financial statements.

This MD & A covers the 6 months ending 31 December 2021 and the subsequent period up to the date of its issue. Additional information relating to the Group is available at [www.sedar.com](http://www.sedar.com). The Group has prepared this MD&A in conformity with the requirements of National Instrument 51-102 ("NI-51-102"). These statements are filed with the relevant regulatory authorities in Canada.

Unless otherwise indicated, the technical disclosure contained within this MD&A has been reviewed and approved by Mr Kevin Wright (a qualified person for the purpose of National Instrument 43-101 ("NI 43-101"), Standards of Disclosure for Mineral Projects). Mr Wright is a full-time consultant to the Group and was not "independent" within the meaning of National Instrument 43-101. Mr Wright consents to the inclusion in this report of the information that he has compiled in relation to the Bau Gold Property, in the form and context in which it appears.

## **Business and Operating Environment**

Besra Gold Inc. is a Canadian incorporated public company which was admitted to the official list of the Australian Securities Exchange (“ASX”) on 6 October 2021 and whose common shares commenced trading on ASX on 8 October 2021 (“Listing”).

### **Bau Gold Project**

Besra is in a consortium with a Malaysian Group with Bumiputra interests that own the rights to consolidated mining tenements covering much of the historic Bau Goldfield in Sarawak, East Malaysia (“Bau Gold Project”).

Besra’s interests in mining tenements extend across four concessional areas, collectively covering approximately 1,340km<sup>2</sup> of Sarawak; the Bau Gold Project (consisting of Blocks A and B), Rawan and Serian (Block C) areas. The Bau Gold Project contains a combined JORC 2012 compliant Resource, on a 100% basis, of 72.61Mt at 1.43g/t Au for 3.33Moz of gold. Both the Rawan and Serian concessional areas are viewed as greenfield exploration opportunities.

As at the reporting date, Besra has a 97.8% interest (92.8% equity adjusted interest) in the Bau Gold Project.

### **Key Personnel**

As Besra transitioned toward the successful listing on ASX in October 2021 the senior management team and board of directors was further strengthened.

On 1 October 2021 Dr. Ray Shaw commenced as Chief Executive Officer. Ray is a geologist with a B.Sc (Hon) and a Ph.D who has been working on the Bau Gold Project for more than the past two years. Besra’s Project Manager for the Bau Gold Project, Mr Kevin Wright, who previously worked for the company on its former Vietnamese mines, and was for nine years general manager for Monument Mining Ltd’s Selingsing Gold Mine in Pahang, Malaysia entered into a service agreement with Besra to continue as Project Manager on a full-time basis on 8 October 2021. Ms Eyrn Kestel has been appointed CFO and Company Secretary October 8, 2021. Ms Kestel has 28 years’ corporate experience that includes over 13 years in the role of company secretary for ASX listed entities and has an established career in accounting and business.

Likewise, there have been several changes to the composition of the Board. Mr Robert Dunne became a non-executive director of the Company following its listing on 8 October 2021. Rob Dunne is a highly experienced metallurgist and process engineer having worked extensively with refractory ores and developing and operating gold processing facilities, including the globally significant Carlin mineralisation belt in Nevada USA. Earlier Messrs. Paul Ingram, and Mark Eaton both became non-executive directors on 10 September 2020. Paul is a geologist and experienced listed public company director who previously worked on the Bau Project in the 2000s. Mark Eaton is a highly accomplished capital markets specialist, previously Managing Director of Global Mining Sales and US Equity Sales for CIBC World Markets before managing a number of listed public companies in recent years, has also joined the board.

### **Property Description & Location**

Besra’s Bau Gold Project is located 30-40km from Kuching, the capital city of the province of Sarawak, Malaysia on the island of Borneo. The Bau Gold project area (Blocks A & B) is centred around the township of Bau. Both concession Block C (Serian) and Rawan, in which Besra has interests, are located east of Bau nearer to the Sarawak/Kalimantan border.

As shown in Figure 1 Kuching, the capital of Sarawak, is located to the north of all four concessional blocks. Kuching is a sophisticated city with international airport and deep-water port facilities, the Kuching district itself containing a population of approx. 640,000 people.

With a population of 6,000 Bau, as the local service centre, is an important source for skilled labour, earth moving equipment, accommodation, general supplies and services. The main industries in the Bau district are limestone quarrying, fish farming, rice farming, palm oil and rubber production. Bau's main population groupings are Bidayuh, from the Dyak ethnic group, and Chinese who are mainly descendants of early miners who arrived in the mid to late 19<sup>th</sup> Century to exploit the gold and antimony deposits at Bau.

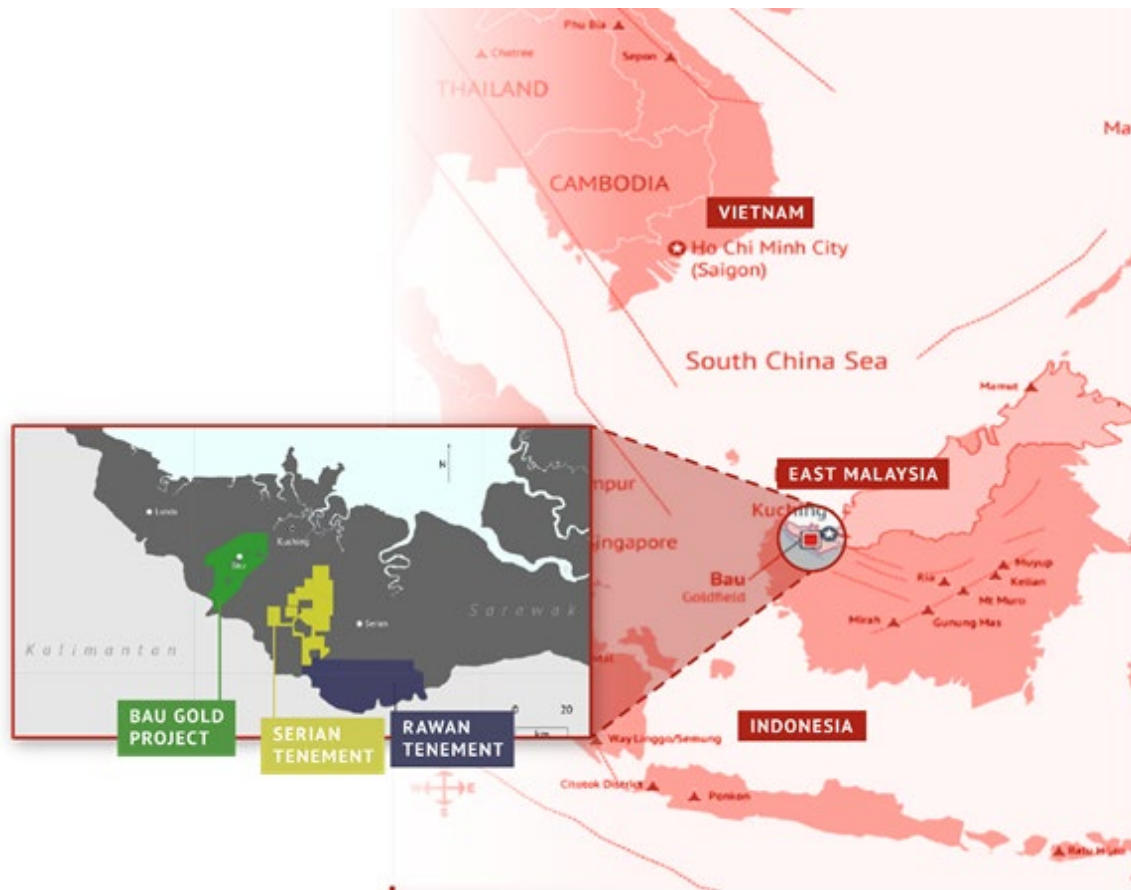

Figure 1 - Location of Besra's interests in mining concessions, Sarawak Malaysia.

The area around Bau township is dotted with kampung (village) style residential developments and domestic farming. Most of Bau's lowland areas have been subject to extensive clearing associated with agriculture and historical gold mining pursuits. Limestone quarrying is a major employer, and there is community support of mining operations as a source of employment, particularly since the closure of the last operating gold mine, at Tai Parit, in 1996.

Sarawak environmental standards are consistent with those of most developing economies which are seeking to balance primary industry activities, such as mining, with sustainable environmental practices which is supported by Besra.

With its proximity to Kuching, the Bau Gold Project benefits from good infrastructure including:

- Existing heavy industry support services;
- Regular and reliable international air services from Kuching to Kuala Lumpur, Singapore, Hong Kong and Jakarta. The airport is only a 40-minute drive from the Bau Gold Project central area;
- Two deep water ports with good dock and storage facilities;

- Two main sealed trunk roads connecting the Bau Gold Project with Kuching suitable for all weather delivery of supplies, heavy plant and equipment;
- Experienced labour and heavy engineering support services;
- Easy accessibility - project extremities are less than a 20-minute drive from the Bau township exploration base, and all the key priority gold prospects are linked by road;
- The area is serviced with reticulated power and water;
- The official language in Sarawak is Bahasa Malaysia but most local communities have English as a second language;
- An active limestone and marble quarrying industry providing products for construction, aggregates and agricultural purposes;
- Earthmoving equipment that supports the existing quarrying industry; and
- A skilled local labour source with mining experience gained from the quarrying industry and past gold mining activity.

### Group Corporate Structure

Besra's interest in the Bau Gold Project is held through its direct and indirect interests in North Borneo Gold Sdn Bhd (NBG). Figure 2 shows the relative ownership interests in NBG.

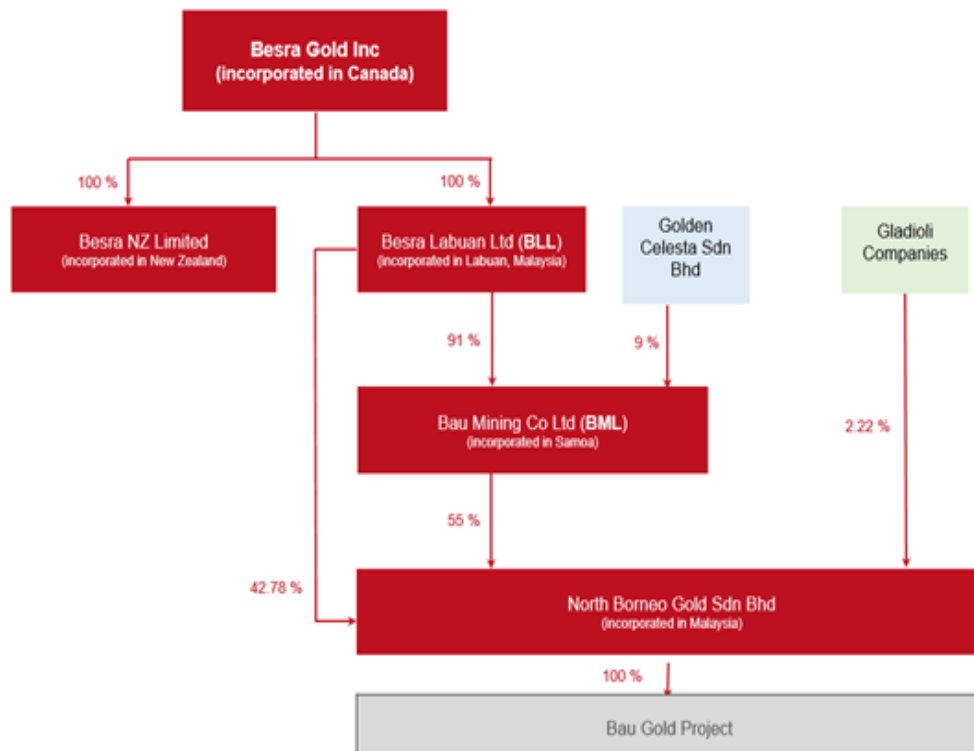

Figure 2 - Corporate Structure of Besra Gold Inc

## Exploration and Development Activities

### Jugan 2021-2022 Drilling Program

During the six months ending 31 December 2021 Besra successfully negotiated drilling, technical and logistical support contracts as well as completed land access arrangements, in order to commence drilling at Jugan on the Bau Gold Project. Drillcorp Malaysia Sdn Bhd was contracted to provide two rigs to undertake diamond hole drilling. This program of between 3,000m – 4,000m is the first drilling conducted at the Bau Gold Project since 2017-2018.

Drilling commenced at the Jugan Project, located approximately 6 km NE of Bau township, in early November 2021. Jugan is the most advanced of the projects at the Bau Gold Project, having a JORC Resource of:

- A Measured + Indicated Resource<sup>1</sup> of 870,000oz at 1.5 g/t Au;
- An Inferred Resource<sup>2</sup> of 90,000oz at 1.6 g/t Au; and
- An additional Exploration Target of 2.0 – 3.2 Moz<sup>2,3</sup> at 1.8 - 2.5 g/t Au.

As at 31 December 2021, seven holes had been completed, with logging and sampling completed on five. During December 2021 samples for drill holes JUDDH 82, 83, 84, & 85 were despatched to SGS's laboratories in Pt Klang Malaysia for assay analysis. The assay results were pending at the end of the Reporting Period.

Hole ID	Project	Easting	Northing	Elevation	Declin.	Azimuth	Depth
JUDDH-82	Jugan	411330	160185	20	-90		62.9
JUDDH-83	Jugan	411360	160200	29	-90		55.1
JUDDH-84	Jugan	411315	160230	34	-90		80.1
JUDDH-85	Jugan	411390	160187	25	-90		55.5
JUDDH-86	Jugan	411435	160170	20	-90		59.1
JUDDH-87	Jugan	411360	160220	29	-50	335	79.2
JUDDH-88	Jugan	411500	160220	35	-50	45	117.4
JUDDH-89	Jugan	411400	160250	30	-50	45	234.3
JUDDH-90	Jugan	411465	160275	25	-50	45	183.4
JUDDH-91	Jugan	411450	160238	32	-90		
JUDDH-92	Jugan	411450	160220	40	-90		

TABLE 1- Jugan Project diamond drill hole specifications.

Although the area is easily assessable, the specific locations of each drill pad have required access ways, culverts and lay-out areas to be prepared. Specifications of each hole are tabulated in Table 1.

Visual sulphide mineralisation has been observed in core recovered from all holes. The sulphides at Jugan are dominated by arsenopyrite with subordinate pyrite, either as highly disseminated fine grain occurrences

<sup>1</sup> Refer Prospectus dated 8 July 2021 in Section 3.11 and Attachment G.

<sup>2</sup> Jugan Exploration Target ranges between 2.0 – 3.2 million Oz based on a range of grades of 1.82 – 2.50 Au g/t

<sup>3</sup> The potential quantity and grade of the Exploration Targets is conceptual in nature; there has been insufficient exploration to estimate a Mineral Resource and it is uncertain if further exploration work will result in the estimation of a Mineral Resource.

mostly within shale shales or more concentrated occurrences associated within veining, stockworks, sand laminations and occasional breccia.

Because of its refractory style, gold mineralisation is normally correlated to the presence of sulphides and visible gold in core is very rare.

The occurrences of sulphide mineralisation at Jugan are consistent with pre-drill expectations.

Between the six months ending 31 December 2021 and lodgement of this Report, Besra released the results of the assays for the drill holes JUDDH 82 to 85 to the ASX on 17 February 2022.

These holes are part of a drilling program focused on infilling historical drillhole control to better define lateral continuity and grade in an area of shallow to outcropping mineralisation. Mineral intercepts for the first 4 diamond drill holes cored at the Jugan Project are summarised below, based on 0.5 g/t cut-off and 1 m or less of internal dilution:

- JUDDH-83: **26 m @ 2.23 g/t Au** from **surface** (0 m) to 26 m;
- JUDDH-84: **58 m @ 2.67 g/t Au** from **surface** (0 m) to 58 m; and
- JUDDH-85: **19 m @ 2.21 g/t Au** from **9 m** to 28 m.

Assay results for JUDDH -83, -84 and -85 confirm lateral continuity of the Jugan mineralised body between gaps in the historical drilling across the southwestern flank of Jugan Hill. Across this flank mineralisation outcrop geometry and the absence of gold mineralisation in JUDDH-82 confirm that the mineralisation is terminated towards the southwestern boundary of ML 140 by a fault, previously interpreted as northwest trending. Intercepted grades of mineralisation across the southwestern flank of Jugan Hill are consistent with historical drill results and support this to be an area of substantially higher-grade mineralisation, relative to Resource estimated grades for the Jugan Project overall.

JUDDH-84 intercepted a continuous interval of mineralisation (58 m @ 2.67 g/t), some 15 – 20 m thicker than that encountered in surrounding historical drill holes.

Likewise, JUDDH-83, intercepted a substantial thickness of mineralisation extending from the surface to 26 m which is more uniform and consistent than that encountered in surrounding historical drill holes. Further subsurface infill control will be provided at shallow depth, and step-out control at depth extensions (particularly down-dip control of the mineralisation in the direction of the north-easterly plunging limb), by JUDDH-87, -88 and -89, the assay results of which are both currently pending.

JUDDH-85 also encountered higher grade mineralisation relative to that encountered in more proximal historical drill holes. Drill holes JUDDH- 91 and -92 are planned to provide dual objectives, infill control within the shallower section and step-out control within the lower portions of the holes which are extended to investigate further mineralisation down dip in the direction of the north-easterly plunging mineralised limb.

### **Jugan Environmental Impact Assessment**

The Environmental Impact Assessment (“EIA”) is a process of evaluating the likely environmental impacts associated with a future proposed development proposal of the Jugan Project involving mining and processing. The EIA is being undertaken by a Sarawak based firm, Chemsain Konsultant Sdn Bhd and involves an area of approximately 300 hectares, encompassing MLs 140 and 1/2013/1D. The EIA is anticipated to be completed during Q2/Q3 2022.

This EIA is a process of evaluating the likely environmental impacts associated with a future proposed development proposal of the Jugan Project involving mining and processing. The EIA will be used for decision-making purposes by the Natural Resources and Environment Board of Sarawak and other relevant agencies.

### **Pejiru Project**

Drilling is scheduled to commence at Pejiru at the completion of the drilling program at Jugan and will target extensions to the Pejiru Mineral Resource which has already been delineated:

- An Inferred Resource of 0.97Moz at 1.2 g/t Au, and
- An additional Exploration Target of 1.7 – 3.3 Moz<sup>2,3</sup> at 1.7 -2/4 g/t Au.

Previous drilling intercepts to be followed up included:

- KPDDH01 – 32 m @ 11.4 g/t;
- KPRC 65 – 55m @ 2.3 g/t;
- KPRC02 – 81 m @ 3.26 g/t, including:
  - 11 m @ 12.13 g/t; and
  - KPRC 66 – 20 m @ 1.8 g/t.

### **Administration Footprint**

Besra has rapidly established its operational centre in the township of Bau including upgrading the office and living quarters and communications. New core and sample shed facilities have been constructed.

Technical and logistical support for the drilling operations has been contracted to Geoimpact Resources. Geoimpact include a group of very experienced geologists and operational specialists several of whom had previously worked at Bau with Besra and with the drilling contractors Drillcorp Sdn Bhd. Overall supervision is provided by Kevin Wright, Project Manager.

During the six months ending 31 December 2021, the Company met with community leaders, landowners, and other stakeholders at Bau to discuss forecast exploration plans, project management, access needs and the implementation of COVID public health care protocols for employees & contractors consistent with national and state government regulations.

---

<sup>2</sup> The Pejiru Exploration Target ranges between 1.7 – 3.3 million Oz based on a range of grades of 1.76 – 2.44 Au g/t

<sup>3</sup> The potential quantity and grade of the Exploration Targets is conceptual in nature; there has been insufficient exploration to estimate a Mineral Resource and it is uncertain if further exploration work will result in the estimation of a Mineral Resource.

## Corporate Overall Highlights

The Group Financial Statements are prepared on a consolidated basis.

Besra received conditional admission approval from the ASX on 24 September 2021 (**Conditional Admission**), was admitted to the Official List of the ASX on 6 October 2021, and its securities quoted and commenced trading on 8 October 2021.

The IPO raised A\$10.043m. Following Conditional Admission, the Company issued the following CDIs on 29 September 2021:

- 83,942,611 to holders of the secured notes in full satisfaction of all amounts outstanding under those notes.
- 52,274,000 to the holders of the Bridge Notes and Novus Advances in full satisfaction of all amounts outstanding under the respective financing agreements.
- 69,844,355 upon Conditional Admission to the holders of the Creditor Notes / New Notes in full satisfaction of all amounts outstanding under the Creditors Notes / New Notes.
- 532,457 to certain trade creditors.
- 12,500,000 to Gladioli Group.
- 20,000,000 to Pangaea Resources Limited ('Pangaea').
- 50,218,484 to IPO investors to raise \$10,043,697.

The cash proceeds from the IPO are applied towards exploration & development activities at the Bau Gold Project, general working capital, listing costs and other trade creditors of the Group.

## Corporate and Administrative Expense

in USD	3 Months to 31 December		6 months to 31 December	
	2021	2020	2021	2020
Professional & Consulting Fees	165,472	662,952	287,116	955,194
Management & Administration	83,663	94,943	211,293	445,008
Listing Costs	217,343	-	217,343	-
Office & Facilities	62,916	21,295	117,607	53,398
Insurance	31,947	(549)	32,274	24,096
Directors Fees	42,873	71,875	78,255	106,875
	604,214	850,516	943,888	1,584,571

## Bau Project Exploration and Evaluation Expenditure Detail

in USD	3 Months to 30 September		3 months to 30 September	
	2021	2020	2021	2020
Exploration Office and Consulting	(160,706)	40,807	(108,037)	123,515
Labour	4,656	(237,437)	4,656	(237,437)
	(156,050)	(196,630)	(103,381)	(113,922)

The credits for expenses in the current and the 2020 periods arose from an over-accrual of costs up in previous periods.

## Summary of Assets Held

As at 31 December 2021 total assets amounted to \$21,378,737 including exploration and evaluation assets of \$17,842,848. Total liabilities amounted to \$1,305,765.

The Group's sole asset Bau Gold Project, refer above, consists of mining and exploration tenements within the Bau Goldfield. Besra's 100% owned subsidiary Besra Labuan acquired its interest in North Borneo Gold (NBG), which owns rights to the mining tenements covering the area of Bau. Besra acquired its interest in Bau in accordance with the agreement for the sale of shares in NBG between Gladioli, Besra Labuan and Mr. Ling Lee Soon (guarantor of Gladioli) dated 1 October 2010, as amended and restated on 12 May 2013 and 17 November 2016 ("SPSA").

Under the terms of the SPSA Besra was required to pay a further \$7.6 million consideration to Gladioli to acquire the remaining shares in NBG. In March 2021, in consideration of the issue to Gladioli of 12.5 million Besra CDIs issued at A\$0.20 per CDI upon completion of the Listing, Gladioli, Besra and Besra Labuan agreed to a further amendment of the SPSA and to release Besra and Besra Labuan of their obligations to complete the purchase of the remaining shares in NBG ("SPSA Variation"). Pangaea agreed to acquire 16,221 shares in NBG for cash consideration of A\$4.0 million and Besra agreed to acquire 14,419 shares in NBG from Pangaea by issuing 20.0 million CDIs to Pangaea at A\$0.20 per CDI upon completion of the Listing.

Pangaea acquired the 14,419 NBG shares on 7 July 2021. Upon the issue of the 12.5 million and 20 million CDIs to Gladioli and Pangaea respectively, Besra's interests in NBG increased to 97.8% and its equity-adjusted interest increased to 92.8%.

## Liquidity & Capital Resources

On 31 December 2021, the Group had cash on hand of \$3,468,863 (2020: \$38,675) and working capital surplus of \$2,287,707 (2020 a deficit of \$21,376,276).

Cash used in operating activities was \$2,811,531 for the 6 months to 31 December 2021 (2020: \$1,147,267). The investing cash expenditure for the 6 months was \$336,426 of exploration and evaluation costs (2020: \$nil) at Bau Gold Project.

During the period \$398,948 of additional funds were raised together with share capital of \$7,383,122 (2020: \$1,345,756) to fund ongoing working capital and to repay existing loans of \$1,176,396.

## Related Party Disclosure

The Financial Statements include the statements of Besra Gold Inc. and the subsidiaries in the following table:

Company Name	Jurisdiction	Ownership % 31 Dec 2021	Ownership % 30 Jun 2021
Besra NZ Limited (formerly OYM NZ Limited)	New Zealand	100.0	100.0
Bau Mining Co Ltd	Samoa	91.0	91.0
North Borneo Gold Sdn Bhd	Malaysia	97.8	87.1
Besra Labuan Ltd (formerly Olympus Pacific Minerals Labuan Limited).	Malaysia	100.0	100.0

Related parties of the Group considered to be Key Management.

### Key Management

in USD	3 Months to 31 December		6 Months to 31 December	
	2021	2020	2021	2020
Management fees and salary expense	178,319	203,125	278,069	278,125

The related party transactions were incurred in the normal course of business and were measured at the exchange amount.

### Contractual Commitments

Pursuant to the terms of the SPSA Variation NGB entered into a Consultancy Agreement with Bukit Young Goldmine Sdn Bhd, ('Contractor') a member of the Gladioli Enterprises group to provide to consultancy services to the Group.

A fee of \$A250,000 per annum, will be paid quarterly in arrears to the Contractor in consideration for the Services over the two-year term of the agreement. The agreement may be extended on terms mutually agreed between the parties.

### Selected Annual Information

in USD	Year Ended 30 June 2021	Year Ended 30 June 2020	Year Ended 30 June 2019
Revenue	-	-	-
Profit (loss) & comprehensive profit (loss)	1,977,662	(1,062,046)	(22,500,523)
Comprehensive profit (loss) attributable to shareholders of the parent	1,981,359	(1,057,833)	(18,863,527)
Basic and Diluted profit (loss) per share	0.007	(0.001)	(0.019)
Total Assets	17,564,800	17,605,914	17,586,915
Total Liabilities	32,362,224	19,088,669	17,530,848
Total Equity	(14,797,424)	(1,482,755)	56,067

### Summary of Quarterly results

The following table sets out the selected quarterly financial information prepared in accordance with IFRS for each of the Group's last eight quarters

	Q2 2022	Q1 2022	Q4 2021	Q3 2021	Q2 2021	Q1 2021	Q4 2020	Q3 2020
Profit (loss)	(8,379,845)	3,972,411	(10,261,717)	(715,815)	(1,277,304)	(1,057,833)	(1,254,508)	576,055
Profit (Loss) per share	(0.028)	0.014	(2.129)	(0.149)	(0.265)	(0.219)	(0.260)	0.120

There was no Revenue earned during any of the quarters.

The variance in Net profit Income for the Q1 2022 period is due, in the main, to settlements with a number of parties in Trade payables, Accruals and other payables which resulted in a recovery of \$3,058,719.

In the Q2 2022 period there was a Fair value loss on settlement of loans of \$4,609,328 and share based payments of \$2,707,000. Variances in profit (loss) in other periods are mainly due to re-valuing derivative liabilities and any other fair value adjustments and impairments.

### Off-Balance Sheet Arrangements

The Group has no off-balance sheet arrangements.

## Financial Instruments

The Group has not entered into any financial agreements to minimise its investment, currency or commodity risk.

## Outstanding Share Data

in USD	Number of Common Shares	Amount
Balance 30 June 2021	4,818,622	141,517,358
Issue of CDIs to holders of Derivative Liabilities	153,786,966	22,609,800
Issue of CDIs to Bridge Notes and Novus Advances holders	52,274,000	7,685,354

Management anticipates that all relevant pronouncements will be adopted for the first period beginning on or after the effective date of the pronouncement.

## Accounting Policies

The accounting policies and methods of computation are described in the Audited Consolidated Financial Statements for the year 30 June 2021 and are consistent with those adopted for preparation of the Unaudited Condensed Interim Consolidated Financial Statements for the six months ended 31 December 2021.

## Risk Factors and Uncertainties

Readers of the MD&A are encouraged to read the "Risk Factors and Uncertainties" as more fully described in Besra's filings with the Canadian Securities Administrators. It is also included in the Audited Consolidated Financial Statements for the year ended 30 June 2021.

## Impact of Covid

As at the end of December 2021 the COVID-19 situation in Malaysia continued to improve with daily cases of between 2,800 and 3,000 being reported.

Besra and its operating subsidiary North Borneo Gold Sdn Bhd follow all governmental COVID-19 restrictions and policies.

Besra continues to closely monitor developments around the COVID-19 pandemic, particularly the impact of the omicron stain which has more recently seen an increase in infection rates. The Group follows the measures recommended by public health and government authorities. Besra will continue to monitor the situation with our priority being the health and safety of our employees and our surrounding communities.

**Subsequent events**

There have been no other significant events after the reporting date, save for the following announcements released to the Australian Securities Exchange

- 31/01/2022 : Quarterly Activities Report including Appendix 5B for December 2021 Quarter
- 17/02/2022 : “Outstanding First Gold Assays for drilling at Bau Project”.
